

Xin Chào

Studying at the prestigious Sunnybank State High School has been nothing short of pleasant, coming from Vietnam I was highly surprised when I saw the variety of subjects offered to the students with all interests. It was an exciting adventure that I took great pleasure in taking part of. I was nervous thinking I wasn't going to adapt well to a new culture, new environment, new people and yet I am here, proud to be a part of the year 12 cohort on their way to graduation. I was met with a warm welcome by the down-to-earth staff, the amazing friends and the hard-working teachers who go out of their way to make sure I had a strong grasp on the material.

What I found about this school that really impressed me was the well-equipped facilities for every single block. The computers are always available, the science block is always prepared for the craziest experiments. These cutting-edge facilities helped me engage in learning tremendously and if there was anything wrong, I always received the utmost quality of care and support.

With the spectacular teachers and the many great things about the school, I always find myself looking forward to the school day despite the stress. The school has provided me with the best environment I could ever ask for to allow me to pursue my education, prepare myself for a bumpy road ahead and to develop my physical and emotional growth. For that, I can never forget about the beautiful memories that I have made and will remember the rest of my life. Thank you, Sunnybank State High School.

Good luck!

Luke - 2021
