

'Hi, everyone my name is Martin and I'm currently studying in Sunnybank SHS year 12. I was born in Hong Kong and I lived there until 4 years ago. I came to Australia September 2016. It was the first time I moved to a new country and making a life here. The first city we set our feet on the land of meat pie, vegemite and all other good stuff was Adelaide.

It took me 2 years to get used to the Australian way of life and still today, I'm learning and trying to assimilate. Since my family decided to move to a new State my parents discussed with me about my new school. I chose a school that is the closest to my house, and this is how I got here. When I was introduced to Sunnybank SHS I realised the multicultural atmosphere in this school. Since my communication skill wasn't too bad back then it wasn't particularly difficult to make friends. After 2 years of studying in this school I'm in love with the subject maths and of course, my favourite teacher Ms Platt. She is a supportive and encouraging teacher and even though I wasn't relatively in love with the subject Design she still supported me throughout the lesson or even outside it.

With school comes free time, I enjoyed playing games with my newly met friends and just binge playing all day. Even though it might not be attractive to other people but it was my favourite activity to relax. Since I study from time to time I didn't need the help from the ISP Hub but it was much appreciated.

There were a lot of activities every year and even though I'm not such a party person it was still a fun experience. I want to say thank you to my family for supporting me outside school and everyone in this school for providing such a comfortable place for my last 2 years of school.'

Martin
